---

Professional Summary

Aspiring **Full Stack Developer** with hands-on experience in **AI-powered web applications**, **API integrations**, and **machine learning solutions**. Skilled in **React.js, Next.js, Node.js, Python, and MongoDB**, with a passion for building scalable, user-friendly, and high-performance digital products. Seeking to contribute to innovative projects while continuously learning from industry experts.

Technical Skills

- **Languages & Frameworks:** Python, JavaScript, Java, HTML5, CSS3, React.js, React Native, Node.js, Next.js
- **AI & ML Tools:** TensorFlow, OpenCV, NLP, Generative AI, Model Fine-tuning
- **Databases:** MongoDB, MySQL
- **Web Technologies:** RESTful APIs, Integration Testing, Backend Development
- **UI Tools:** Tailwind CSS, Figma
- **Version Control:** Git, GitHub
- **Other:** IoT, Web Deployment, Cloud Basics (AWS / Firebase)

Key Projects

- **AI Document Generator Website** *(Mar 2025 – Jun 2025)*
  Developed an AI-based web app for document generation using NLP; added user authentication, real-time output, and responsive UI with React.js & Tailwind CSS.
- **College Rides App** *(Nov 2024 – Jan 2025)*
  Built a React Native ride-sharing app with Node.js & Firebase for real-time tracking, smooth communication, and intuitive UI/UX.
- **Temperature & Humidity Prediction System** *(Aug 2024 – Nov 2024)*
  Created an ML model in Python to forecast weather metrics with an interactive dashboard for real-time insights.
- **Virtual CA & Legal Advisor (AI Assistant)** *(Aug 2025 – Present)*
  Developing an AI-powered advisor for tax and legal queries using Python, NLP, and Generative AI for automated analysis and recommendations.
- **Event Management Website** *(Aug 2025 – Present)*
  Built a responsive business website with event listings, booking forms, and CMS integration for easy content updates.
- **Gesture-Controlled Virtual Mouse** *(Sep 2023 – Dec 2023)*
  Implemented a real-time virtual mouse using OpenCV and Python for gesture-based system control.

- **Safety Mining Helmet (IoT Project)** *(Jun 2023 – Oct 2023)*
  Developed a smart helmet with IoT sensors for gas detection, temperature monitoring, and live location tracking.
- **Learory Startup Website** *(Feb 2025 – Apr 2025)*
  Created a performance-optimized startup website with SEO improvements and CMS integration for scalable management.

Education

B.Tech in Computer Science and Engineering
The YBN University | *2021 – 2025* | CGPA: **8.0 / 10**

Senior Secondary (XII), CBSE – Science
Viva The School, Guntur | *2021* | Percentage: **81%**

Secondary (X), CBSE
Happy Valley International School, Krishna | *2019* | Percentage: **73%**

Achievements & Extracurricular Activities

- **NCC "B" Certificate Holder** – Discipline and leadership through national cadet training.
- **National-Level Table Tennis Player** – Represented state in multiple tournaments.
- **Leadership Roles:** Served as **President** and **Secretary** for university clubs.
- **Freelancing Work:** Experience in **video editing, photo editing**, and **graphic design** for clients.

Key Achievements

- Developed **7+ full-stack and AI-based projects**, integrating modern tools like **React.js, Node.js, and Python**.
- Built an **AI-powered document generator and virtual legal advisor**, improving automation and user engagement.
- Implemented **machine learning models** for weather prediction with **85% accuracy** using Python and Scikit-learn.
- Achieved **national recognition as a Table Tennis player** and earned the **NCC "B" Certificate** for leadership and discipline.
